

DTRP Street Stock Divisional Rule Amendment for 2012

2/13/2012

Under the frame section of the rulebook; the rule that reads,

The stock steel unaltered floor pans, firewalls, wheel wells, and front inner fender walls can be removed. Rear wheel wells from the center line of wheel may be removed.

Should read as follows,

Stock wheel wells, and front inner fender walls can be removed. Rear wheel wells from the center line of wheel may be removed. Firewall and floor pan's MUST BE IN STOCK LOCATION AS PRODUCED FROM MANUFACTURER.

This is effective immediately. There are to be no modifications made to these areas in anyway. Any questions call Tech Director Mike McDonald or Race Director Todd Hannon.
